History

#1 - 10/23/2024 10:50 PM - M Z Niloy KHAN

- File Maskcreator with subclass.asta added
- File Mask creator copy.png added
- Assignee set to M Z Niloy KHAN

This is the draft astah file of mask creator class. The independent functions of the program that essentially does image processing has been added to a subclass called process. This changed has been made considering the fact that this functions might go unnoticed or remain unknown if someone tries to implement the program with the diagrams. It might be further updated in the main UML diagram
