G22-2024 - Support #1285

Programmer - Week12 - Learn python

12/13/2024 11:00 AM - Toma IKUTA

Status:	Resolved		**Start date:**	12/13/2024
Priority:	Normal		**Due date:**	12/19/2024
Assignee:	Chung Hsi LIN		**% Done:**	100%
Category:			**Estimated time:**	1.50 hour
Target version:			**Spent time:**	0.50 hour

Description

Please review fundamental methods of OpenCV for Python.

How to read images?
How to specify image size when showing image?
How to cut images?
How to change RGBA values?

Also I'd happy if you would learn how to implement the alpha and gamma blending methods.
