Description

The Testing team is tasked with creating a comprehensive test plan for the project. The plan should include:

Test Objectives:
Define the overall goals of testing, including ensuring the functionality, performance, and usability of the application.
Test Scope:
Identify which features and components of the project will be tested (e.g., image loading, alpha manipulation, configuration handling).
Test Types:
Specify the types of testing to be performed (e.g., unit testing, integration testing, functional testing, usability testing).
Test Cases:
Outline the test cases that need to be covered, including input data, expected outcomes, and any edge cases.
Testing Tools and Resources:
List the tools, frameworks, and resources needed for testing (e.g., Selenium for UI testing, Jest for unit testing).
