- Subject changed from UML TEAM to UML

#2 - 12/17/2024 10:48 AM - Htar Aung THET

The UML Team is responsible for creating and managing the design documentation for the project. The tasks include:

- Understand the Math Behind the Project:
Review and understand the mathematical concepts relevant to the project to ensure accurate representation in the design.
- Configuration Setup:
Perform the required configuration setup for design tools and environments.
- Prepare UML Draft Design:
Create a draft version of the UML diagrams, including class diagrams, sequence diagrams, activity diagrams, and other necessary design artifacts.
- Create UML Diagrams:
Finalize and refine the UML diagrams based on the project requirements and feedback.
- Skeleton Code Generation:
Use the UML diagrams to create a preliminary version of the project's skeleton code, ensuring it aligns with the design structure.
