The Wiki Team is responsible for creating and maintaining project documentation to ensure clarity and accessibility of information for all team members. The tasks include:

Create the Wiki Structure:
Set up the wiki to serve as a central hub for all project-related information.
Meeting Documents:
Document agendas, meeting notes, and decisions from team meetings.
Member Profiles:
Create and update team member profiles, including roles, responsibilities, and contributions.
Functional and Non-Functional Requirements:
Document the functional and non-functional requirements of the project clearly and concisely.
Math Documentation:
Prepare and upload documents explaining the mathematical concepts used in the project.
UML Diagram Explanation:
Provide explanations for all UML diagrams, including their purpose and how they relate to the project.
Project Results:
Document the final results and outcomes of the project.
User Manual:
Create a user-friendly manual explaining how to use the project's features and functionalities.
Test Report:
Upload the final test report, summarizing the testing process, results, and any findings.
