The Doxy Commenters Team is responsible for creating and maintaining documentation within the codebase using Doxygen. The tasks include:

- Set Up Project Website with Doxygen:
  - Generate the Doxygen-based website to document the project code automatically.
  - Ensure the structure and navigation are clear and easy to follow.
- Add Code Comments for Doxygen:
  - Write detailed comments in the source code following the Doxygen syntax.
  - Include descriptions for classes, functions, variables, and parameters to ensure comprehensive documentation.
- Configure Doxygen Files:
  - Set up and manage the Doxygen configuration files (Doxyfile) to customize the documentation output.
  - Configure features like file exclusions, diagrams, and output formats.
- (Optional) Automate Doxygen Generation:
  - Implement an automation process to regenerate Doxygen documentation whenever the code is updated, using tools like CI/CD pipelines.
