Description In order for all the team to understand how the development is progressing, I will asses a weekly coding report issue in here. The contents of the report should be: <ul style="list-style-type: none">• Code progress - Whatever the development team achieved in the past week.• List of classes with respective attributes, methods, and relations. Also explain to which part of the code these apply.• Add a good meme at the end about coding (if possible). If there is nothing to write, just resolve the issue and notify the PM or PL the reason to that.
